THE FIRST IN A SERIES OF PRODUCTS THAT  
KILLS RODENTS AND THE FLEAS THEY HOST

# Kaput-D Combo Bait®

He's not cute.

He destroys crops meant for human consumption and pasture meant for cattle, sheep and other livestock.

He is a major pest.

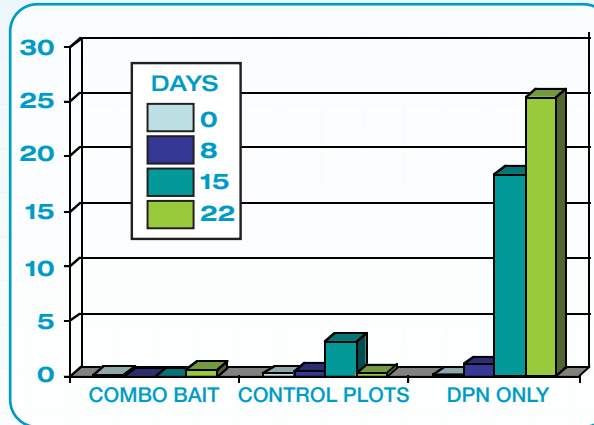

However, that is not the most dangerous thing about this creature. He carries fleas that may cause plague. When the rodent is aggressively eliminated with baits, those fleas look for other warm-blooded hosts. These hosts may be human, pets or wildlife.

Now, Kaput Rodent Control Products have come up with a way to solve this problem. We have the first and only product that controls the rodents and their fleas - **Kaput-D Combo Bait®**.

Now you can be proactive in dealing with the pests and California Ground Squirrels.

Number of fleas near burrow entrances after use of Combo Bait, no-bait Control plots, and 0.01% diphacinone (DPN) only ground squirrel bait. Rodenticides alone trigger dramatic increases in flea numbers near burrow entrances, while searching for new hosts.

We are **EPA REGISTERED**.

We have spent years developing and testing this brand new technology. **Kaput-D Combo Bait®** for California Ground Squirrels and its fleas has been thoroughly tested in the field and in the lab.

We have submitted data to both the EPA and the State of California. Both have approved this innovative product and now we can offer the bait to you.

This is the first of a series of products that will utilize the same technology (a 1-2 punch) for handling rodent control.

An **INNOVATIVE SOLUTION** with amazing results.

The *California Ground Squirrel* carries fleas that may transmit plague. When these fleas find a human host, they can transfer bubonic plague and pneumonic plague. Often there are increased incidents of plague when there have been aggressive attempts to control rodents and their fleas look for other warm-blooded hosts (like humans and pets). That's why **Kaput-D Combo Bait®** is made especially for use on the *California Ground Squirrel* and its fleas. Our innovative solution is the best product available, with amazing results.

**GET RID** of the pest and their fleas.

*California Ground Squirrels* are classified as nongame mammals by the California Fish and Game Code. Nongame mammals injuring growing crops and property may be controlled in any legal manner by the owner or tenant. **Kaput-D Combo Bait®** has been approved by the State of California for use against the *California Ground Squirrel*.
